To Whom It May Concern:

It is my personal and professional privilege to give Michelle White of Crystal Clear Science a wholehearted recommendation.

During the past four years I have worked in the AEP River Operations Communications Department. Our department initiated an educational program called RiverWorks Discovery which is designed to educate the public about the importance of the barge industry.

Since we were in the beginning stages of working with our program, Michelle was invaluable to us in creating innovative experiments that were very appealing to both children and adults. She is a reliable self-starter and adept at working in a wide variety of venues. She worked at numerous fairs, special events, conventions and flower shows. She is effective in successfully relating to many different audiences. She also organized and implemented the presentation of our program in school assemblies. In addition to actually working the events she researched and provided for our review many opportunities for possible program presentations.

We are currently moving our RiverWorks Discovery program in a different direction. Due to this we know that Michelle will be exploring other possibilities for her business. I give my unconditional recommendation of Michelle White and Crystal Clear Science to you.

Sincerely,

Cathy Mosher
Communications
